1 Background and Acknowledgements

2 Scope and Definitions of DDR PA

The DDR PA dataset codes the presence or absence of disarmament, demobilization, and reintegration provisions in intra-state peace agreements between 1975-2021. It also codes whether a DDR provision provides for the involvement of a third-party actor and whether it provides specific provisions for women and child ex-combatants.

The description of each variable is to be found in the *Variables* section of this document. DDR PA focuses on peace agreements that were concluded in state-based conflicts (i.e. a conflict in which one or more actors is the government). Non-state conflicts (where none of the actors is the government) and conflicts that remain below the 25 battle-related threshold are not included in the dataset. Data for DDR PA is based on primary sources, i.e. data is obtained from the text of the peace agreement. The text of the peace agreement was accessed through UCDP, PAX, or the UN Peacemaker website.

3 Definitions

DDR PA builds on the key definitions and existing data collection by the Uppsala Conflict Data Program (UCDP). DDR specific definitions are adopted from the UN's Integrated DDR Standards (IDDRS, 2019).

3.1 Unit of Observation

The unit of observation for the DDR PA is the conflict dyad peace agreement. A conflict dyad consists of “two armed and opposing actors. A state-based conflict

dyad is defined as two actors, with one or more being the government, that have a stated incompatibility” (Uppsala University, 2021).

3.2 Peace Agreement

We adopt the definition of a peace agreement from UCDP according to which “a peace agreement is a formal agreement between at least two opposing primary warring parties, which addresses the disputed incompatibility, either by settling all or part of it, or by clearly outlining a process for how the warring parties plan to regulate the incompatibility” (UCDP Peace Agreement Dataset Codebook Version 19.1, p.2). In total, the UCDP dataset identifies 374 PAs throughout the period 1975-2021. The dataset considers three types of peace settlements.

- A full agreement is a settlement where one or several dyads agree to settle the whole incompatibility.
- A partial agreement is a settlement where one or several dyads agree to settle a part of the incompatibility.
- A peace process agreement is a settlement where one or several dyads agree to initiate a process that aims to settle the incompatibility.

The DDR PA dataset considers only full and partial peace agreements (N=289).

3.3 Disarmament

Disarmament is the collection, documentation, control and disposal of small arms, ammunition, explosives and light and heavy weapons of combatants and often also of the civilian population. Disarmament also includes the development of responsible arms management programmes

3.4 Demobilization

Demobilization is the formal and controlled discharge of active combatants from armed forces or other armed groups. The first stage of demobilization may extend from the processing of individual combatants in temporary centres to the massing of troops in camps designated for this purpose (cantonment sites, encampments, assembly areas or barracks). The second stage of demobilization encompasses the support package provided to the demobilized, which is called reinsertion.

3.5 Reintegration

Reintegration is the process by which ex-combatants acquire civilian status and gain sustainable employment and income. Reintegration is essentially a social and economic process with an open time-frame, primarily taking place in communities at the local level. It is part of the general development of a country and a national responsibility, and often necessitates long-term external assistance.

4 Variables

For compatibility and ease of integration with widely used existing datasets, we include a number of general variables on region, country, year, actor ID, type of actor, and conflict ID mostly from the UCDP/PRIO data.

4.1 Agreement Identifiers

ID	DISARM PA unique ID for the peace agreement
PAX_ID	PAX Peace Agreement ID

UCDP_PA	UCDP Peace Agreement ID
---------	-------------------------

4.2 Conflict Variables

The variables below and their description are adapted directly from the UCDP Peace Agreement dataset codebook. Reference: Pettersson, Therese Magnus Öberg (2020) Organized violence, 1989-2019. *Journal of Peace Research* 57(4).

region	Numerical coding of the geographical region. 1 = Europe (GWNo: 200-399) 2= Middle East (GWNo: 630-699) 3= Asia (GWNo: 700-999) 4= Africa (GWNo: 400-626) 5= Americas (GWNo: 2-199)
gwno	GW numbers/country codes of all locations of the conflict incompatibility
conflict_id	UCDP/PRIO Conflict ID
conflict_name	The name of the conflict Dyad id UCDP/PRIO Dyad ID
dyad_name	The name of the dyad
actor_ID	UCDP/PRIO Actor IDs
actor_name	The name of all actors, warring parties and IGOs, signing the peace agreement
incomp	General coding of the conflict issue base don UCDP coding. 1=Territory, 2= Government, 3= Government and territory

4.3 Peace Agreements Variables

The variables below and their description are adapted directly from the UCDP Peace Agreement dataset codebook. Reference: Pettersson, Therese Magnus Öberg (2020) Organized violence, 1989-2019. *Journal of Peace Research* 57(4).

pa_name	The official name of the Peace Agreement
year	The year in which the peace agreement was signed
pa_date	The date of the last signature of the peace agreement
pa_comment	The comment include information on the type of agreement, some general information about the agreement, how the behavior of the parties was regulated, how the incompatibility was regulated and last if the agreement included other provisions than the above stated.
pa_sign	The warring parties (e.g. a government) and the actual persons names (e.g. a president) who signed the agreement.
pa_3rd	Indicates whether the peace agreement was signed/mediated/facilitated by a third-party. Coded as 1 if a third-party was involved, 0 otherwise.
pa_3rd_categorical	Indicates whether the peace agreement was signed/mediated/facilitated by a third-party. Coded as 1 if a third-party country was involved, 2 if the United Nations (UN) was involved, 3 if a Regional State Organization (ECOWAS, African Union, etc.) was involved, 4 if an NGO (Red Cross, Church, etc.), 0 otherwise
c_3rd	Comment on signatories of peace agreement. The comment include where the agreement was signed, and if the agreement was signed by all warring parties (comprehensive) or only some dyads (dyadic).

pa_type	Indicates the type of peace agreement based on UCDP Peace Agreement dataset coding. 1=full agreement, 2=partial agreement Agreement text Link to the text of the agreement on which the coding was based.
ddr_ucdp	Indicates UCDP coding regarding the presence of absence of a ddr provision.

4.4 DDR variables

disarm	Coded as 1 if there is a provision for disarmament, 0 otherwise.
demob	Coded as 1 if there is a provision for demobilization, 0 otherwise.
reint	Coded as 1 if there is a provision for reintegration, 0 otherwise.

4.5 Actors

women	Indicates whether there are specific provisions for women and/or female ex-combatants in any of the DDR components of the PA. Coded as 1 if yes, 0 otherwise
children	Indicates whether there are specific provisions for children/child soldiers regarding any of the DDR components of the PA. Coded as 1 if yes, 0 otherwise

third_party	Indicates whether the peace agreement provides for a third-party to be involved in the implementation of any of the DDR components of the PA. Coded as 1 if yes, 0 otherwise
third_party_id	String variable. Indicates whether the UN, a group of states, or a regional organization are involved in the implementation of any of the DDR components of the PA
source	String variable. Indicates the source of the peace agreement's text. UCDP, PAX, or other.
